

SAVING LIVES. PROTECTING PROPERTY.

Advanced Training Workshop

June 2-3, 2016 ♦ San Diego, California

Register now for our advanced 2-day Training Workshop and master the skills needed to fully implement Mission Manager's cloud-based incident management system into your organization. We'll show you how to configure and customize Mission Manager for your agency's day-to-day operations and live deployments. You'll also learn how Mission Manager can facilitate multi-agency coordination needed for a unified command.

The workshop will include desktop exercises featuring realistic scenarios such as active shooters, natural disasters, SAR operations and large-scale public events. Learn how to create an online command center and share information among multiple agencies – including law enforcement, fire and rescue, emergency operation centers, SAR/K9 teams – and incorporate spontaneous volunteers into the mission.

Students will receive one-on-one instruction and group training in an intimate setting at Mission Manager's San Diego headquarters. Lunch will be served both days, along with a dinner on Day 1.

AGENDA

Day 1

9 a.m. to 5 p.m.

OBJECTIVES

Based on the core principles of Preparation, Readiness and Execution, Mission Manager will:

- Ensure your team is ready to respond to any emergency
- Simplify personnel and asset management, and ICS reporting
- Enhance situational awareness
- Facilitate multi-agency, multi-jurisdictional collaboration

TOPICS

- Manage and track members' qualifications and team equipment
- Callout members using filters; manage personnel responses
- Configure your team per agency type for multi-agency deployments
- Check in/out unaffiliated members and volunteers
- Maintain and track event logs
- Create offline missions
- Track members' hours in customizable categories
- Import files such as KMZ/KML to create custom maps
- Learn tips and tricks on using map layers, overlays & elements
- Produce debriefs and editable NIMS/ICS reports
